BLANKE DISK-LINE EC

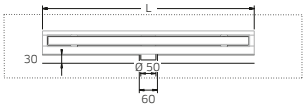
This innovative linear drain is an impressive sealing-water-free system that features unique drainage technology with an integrated drainage lock and a self-adhesive waterproofing membrane. The drainage lock is fitted with a thin silicone flap which serves to permanently protect against odours. The passage to the drainage pipe remains fully sealed and odour-free even during long periods of non-use. The self-adhesive waterproofing membrane is fitted in the factory and can be stuck to the substrate without requiring more glue, and can also be integrated into the self-adhesive BLANKE DISK waterproofing system. BLANKE DISK-LINE EC Linear drain has an integrated second drainage level.

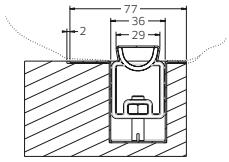
BLANKE DISK-LINE EC

LINEAR DRAIN

Installation height: 70 mm excl. tile thickness — PU: 1 pc.

Body length=cm	Grate length=cm	Art. no.	€/PU
70.0	66.5	280-900-070070	505.56
80.0	76.5	280-900-070080	535.87
90.0	86.5	280-900-070090	559.14
100.0	96.5	280-900-070100	596.43
120.0	116.5	280-900-070120	629.05





BLANKE DISK-LINE EC COMPONENTS

Important note:

A suitable stainless steel grate (can be tiled using supplied accessories) is included in the scope of delivery.

System components (included in price):

1 Multifunctional grate
2 Height-adjustable grate holder
3 Drainage lock with thin silicone flap

Expert tip:

Use BLANKE DI-SECURE as an additional layer of protection to protect your waterproofing membrane!
