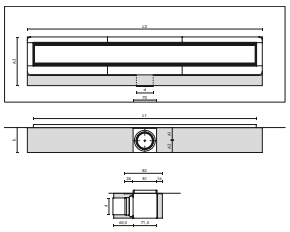
BLANKE DISK-LINE

BLANKE DISK-LINE is a stainless steel drainage channel with a factory-fitted BLANKE DISK waterproofing membrane. With a very low height of 54 mm the new linear drain is especially suitable for low installation heights. The integrated connections (DN 40) for drain pipes with a push-fit system are made of stainless steel. The channel with DN 50 connection option is available with a height of 72 mm. The BLANKE DISK-LINE linear drain with a drain capacity of 37 l/min (0.61 l/s) is a component of the self-adhesive BLANKE DISK waterproofing system.



LINEAR DRAINAGE UNIT 54.0

WITHOUT GRATE COVER, STAINLESS STEEL,
BLANKE DISK WATERPROOFING MEMBRANE

Height: 54.0 mm PU: 1 pc.

Body length=cm	Grate length=cm	Art. no.	€/PU
60.0	56.5	190-900-054060	441.66
70.0	66.5	190-900-054070	462.89
80.0	76.5	190-900-054080	496.86
90.0	86.5	190-900-054090	518.10
100.0	96.5	190-900-054100	522.35
110.0	106.5	190-900-054110	530.84
120.0	116.5	190-900-054120	539.33

Important note:

You can find matching grates on page 116.

Expert tip:

Use BLANKE DI-SECURE as an additional layer of protection to protect your waterproofing membrane!

LINEAR DRAINAGE UNIT 72.0

WITHOUT GRATE COVER, STAINLESS STEEL,

BLANKE DISK-LINE

Important note:

- Simple and reliable to install, thanks to clever installation accessories
- Easy maintenance thanks to intelligent features

1 Body with factory-fitted, integrated self-adhesive waterproofing membrane
2 Protective core
3 Siphon
4 Installation block
5 Stainless steel frame
6 Multifunctional stainless steel grate
7 Grate height adjusters

Please note that components 5, 6, and 7 are not included in the scope of delivery!
