BLANKE TEBA-MAT

BLANKE TEBA-MAT is a multi-layer studded membrane suitable for thin-bed installation in outdoor areas such as balconies and terraces. A special glass-fibre, double-woven mesh is laminated onto the polystyrene studs. In addition, there is a fleece under-side of the sheet which is permeable for diffusion. This thin layer system decouples and drains tiled surfaces. The installation height is 8.5 mm.

Expert tip:

> Anti-frost hollow space
> Thin-bed mortar dries faster

BLANKE TEBA-MAT

h = 8.5 mm, b = 0.6 m, l = 14 m — PU: 1 roll = 8.4 m²
