
NEW BLANKE STELZ-TEC

The BLANKE STELZ-TEC series makes it possible to quickly, simply and reliably lay high-quality tiles, slabs and natural stone coverings on balconies and terraces. Designed for dry laying coverings on terraces, balconies and loggias, the new supporting pedestals from Blanke are heavy-duty, one-piece plastic supports, whose height can be adjusted infinitely by turning. Integrated ribs ensure a predefined, uniform joint pattern. Blanke offers a complete system with the highest all-round reliability and stability for outdoor areas.

Advantages:

- Flexible installation
- Highest level of stability
- Very easy to lay
- Predetermined joint width of 4 mm for a uniform joint pattern
- Optional installation as complete system: Drain mat, edge protector with drainage trims and drainage channel
