

BLANKE SILL PROFILE

Made of stainless steel BLANKE SILL PROFILE is designed to provide a transition between coverings of different heights, in particular in door threshold areas. The polished visible face of the edge profile creates a visually attractive finish that also protects the ceramic tile covering at the same time.

STAINLESS STEEL BRUSHED

3.0

Inner height: 10 mm; Length: 3.0 m

PU: 1 pc.

h1=mm	h2=mm	Art. no.	€/m
