

BLANKE DIBA-LINE EC

The BLANKE DIBA-LINE EC linear drain with compelling, unique drain technology that is easy to clean and also functions without sealing water. A thin silicone flap serves as a permanent odour trap, whereby the EC series seals the drain pipe even when there is a longer period without use. As with the other Blanke linear drains the waterproofing membrane is integrated and the BLANKE DIBA composite sealing can be applied easily and reliably. Clever assistants such as the EPS installation and protection block and a height-adjustable stainless steel grate make the installation far easier.

BLANKE DIBA-LINE EC DRAINAGE CHANNEL WITH COVER

Installation height 70 mm

PU: 1 pc.

Body length = cm	Grate length = cm	Art. no.	€/PU
70.0	66.5	285-900-070070	492.75
80.0	76.5	285-900-070080	522.29
90.0	86.5	285-900-070090	544.97
100.0	96.5	285-900-070100	581.32
120.0	116.5	285-900-070120	613.11

Important notes:

A suitable stainless steel grate (can be tiled using supplied accessories) is included in the scope of delivery.
