

## BLANKE AQUA-KEIL GLASS

Fitted with a profile to mount glass partition walls (e.g. near linear drains), the BLANKE AQUA-KEIL GLASS provides a gradient edge for attractive floor-level showers.

The perfect finish: the deep-drawn moulded part BLANKE DIBA-KEIL (see page 100) or BLANKE DISK-KEIL (see page 107) for reliable waterproofing of the transition from screed to the wall.

**Important note:**

Guiding tip: Left and right version when looking towards linear drain

**Attention:**

It is essential to ensure that the waterproofing membranes (e.g. BLANKE DIBA, BLANKE DISK) are never damaged by BLANKE AQUA-KEIL (see figure 1). Different gradients can for example be compensated by the tile thickness.

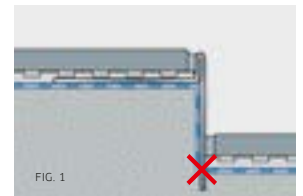

FIG. 1

**Important note:**

Important note: New surface - powder-coated matt white

MATT WHITE

**Expert tip:**

Don't forget to order BLANKE DIBA-KEIL (page 100) or BLANKE DISK-KEIL (page 107) for reliable waterproofing of the transition from screed to the wall!
