

BLANKE MIHA

BLANKE MIHA is a powder-coated aluminium edge protector pro which covers the cross section of the screed or the construction structure. At the same time, the profile can be used as screed form and it assists levelling the screed. The BLANKE MIHA cover joiner and BLANKE MIHA outer corner cover 90° are available to cover joints and corners.

40 × 40	60	892-45919-060	63.69

BLANKE MIHA GRADIENT COVER PROFILE

The wedge-shaped BLANKE MIHA gradient cover profile is available for side areas, and can be combined with the base profile if required. The profile has an incline of approximately 2% and thus creates a perfect horizontal finish. The top side of the profile is equipped with self-adhesive tape.
