

BLANKE DRAIN-MAT

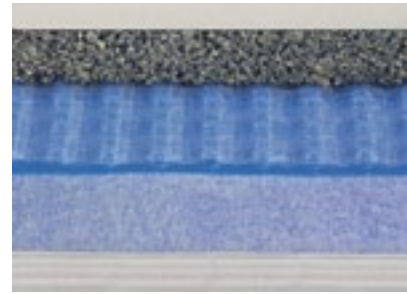

The BLANKE DRAIN-MAT is a studded membrane which has extremely high compressive strength. It guarantees both fast and durable drainage on loose installations. The BLANKE DRAIN-MAT is preferably for use when laying in gravel or grit beds, on supports, mortar pads and in thick layer installation for passive capillary drainage.

BLANKE DRAIN-MAT

9 ROLLS = 1 PALLET (135 m²)

PU: 1 roll

Roll(s)/m ²	Art. no.	€/m ²
1/15	524-900	13.56
9/135	524-900	12.86

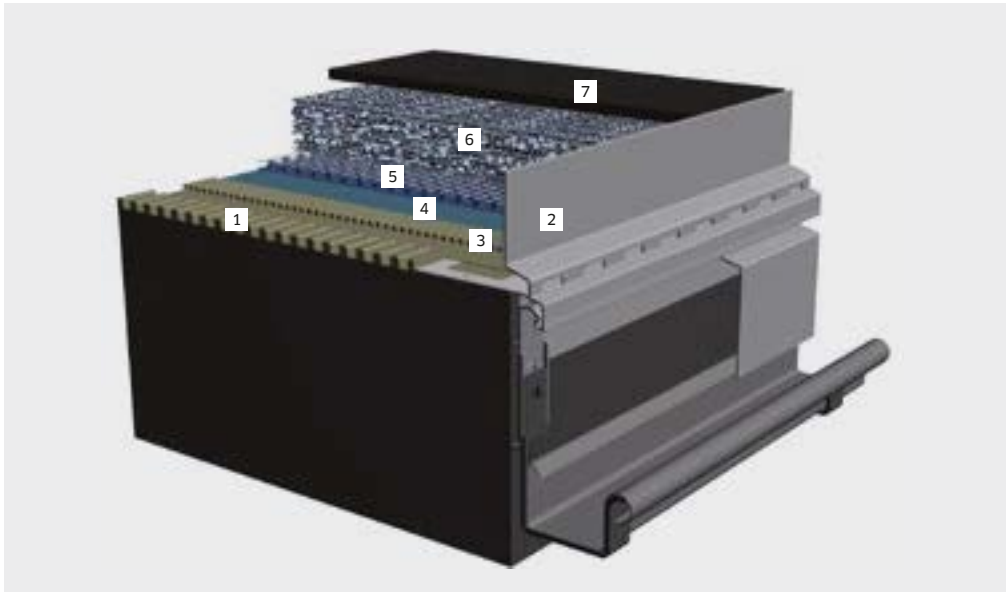

Important note:

Especially for outdoor use

Advantages:

- > Fast, long-term drainage of flooring construction – no hidden rotting under the flooring
- > Highest compressive strength up to 22 t/m²
- > Shape retention up to temperatures of over +80 °C
- > The smooth underside protects the waterproofing membrane beneath
- > Bumps are protected by highly porous fine mesh
