

BLANKE BEND-EASE (BENDING TOOL)

The BLANKE BEND-EASE bending tool, which is made of aluminium and plastic, is used to bend precut brass, aluminium, and stainless steel profiles, as well decorative profiles made of brass and aluminium. A scale guarantees consistently exact bending. BLANKE BEND-EASE enables simple and easy bending of precut metal profiles in order to produce round profile edges and transitions on both sides of ceramic or other flooring.
