BLANKE NEW YORK EDITION

Design down to the last detail

Modern architecture is defined by clarity, minimalism and harmonious colour concepts. With the BLANKE NEW YORK EDITION, a design system is created that seamlessly combines technical functionality with sophisticated design – down to the finest detail.

Selected designer colours for drainage channels, tile trims and shelves open up new possibilities for interior design. Instead of deliberate contrasts, the focus is on clean, continuous lines. The elements blend seamlessly with tiles, walls and floors to create a cohesive overall appearance.

Particularly on trend are tone-on-tone concepts, where trims and drainage channels are precisely matched to tiles or interior finishes. The result is spaces with architectural depth, subtle elegance and a premium, timeless aesthetic.

The BLANKE NEW YORK EDITION stands for consistent colour schemes, precision craftsmanship and maximum design freedom – for bathrooms and living spaces where every detail is designed with intention.

BLANKE EDGE PROTECTOR TRIM

Elegant finishing for wall and floor tiles

BLANKE EDGE PROTECTOR TRIM

Stone Grey

THE ADVANTAGES AT A GLANCE

> Enables consistent tone-on-tone design of wall and floor surfaces

> Clean, precise lines for modern architectural concepts

> Harmonious overall appearance instead of disruptive material transitions

> Clean, technically reliable tile finishing

> High-quality workmanship and durable surfaces

The use of tile finishing profiles is recommended wherever tile edges are exposed to high mechanical stress or where clean edge and corner finishes cannot be reliably ensured. In addition, they also provide decorative accents and contribute to a harmonious overall appearance.
For a consistently high-quality and visually appealing result in tile installation, the use of tile finishing profiles is therefore a practical and effective solution.

BLANKE CUBELINE

Decorative Tile Trim for wall and floor areas

BLANKE CUBELINE

Sand Tropez

THE ADVANTAGES AT A GLANCE

> Striking, cubic design language

> Creates deliberate architectural accents or integrates seamlessly tone-on-tone

> Ideal for minimalist, purist room concepts

> Design profile for clear room edges and precise lines

> Precise edge protection at external corners

> High stability and precise workmanship

BLANKE CUBELINE is a finishing profile for corner solutions in tiled surfaces. The highlight is its distinctive decorative corner appearance, which, unlike conventional finishing profiles, is characterized by the right-angled, symmetrical visible surface of each profile side. The wide range of variants allows for optimal and decorative coordination with a variety of tile and grout colors. In addition, BLANKE CUBELINE protects tile edges and, in its durable stainless steel version, can also be used on stairs.

BLANKE BAY-BOX

The frameless recessed niche

BLANKE BAY-BOX

THE ADVANTAGES AT A GLANCE

> Simple and fast installation thanks to the installation box and waterproofing kit included in the system for easy integration into bonded waterproofing

> Minimalist, decorative, space-saving and, above all, time-saving

> Made from high-quality brushed stainless steel and powder-coated in the trend colours of the BLANKE NEW YORK EDITION

> Can be installed flush with the tile or natural stone wall covering, or projecting, depending on the desired design

> Complements versatile tone-on-tone design concepts

Create sophisticated, stylish storage with the BLANKE BAY-BOX. This frameless niche impresses with its minimalist design language and blends seamlessly into modern interior concepts. Available in the colours of the BLANKE NEW YORK EDITION, it coordinates perfectly with other bathroom elements, making it ideal for cohesive, high-end design concepts.
Crafted from robust stainless steel, the BLANKE BAY-BOX offers a space-saving yet elegant solution for storing toiletries or displaying decorative items. It creates a clean, uncluttered appearance with refined, continuous lines.

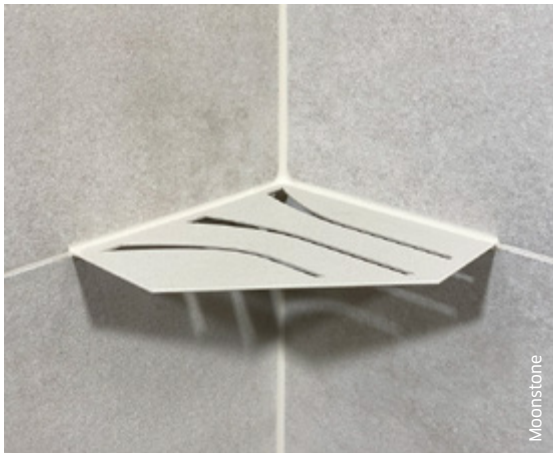
NEW YORK EDITION

BLANKE ECKBERT

The practical corner shelf for your shower

BLANKE ECKBERT



THE ADVANTAGES AT A GLANCE

> Made of robust stainless steel

> Tool-free installation without drilling

> Can also be installed retrospectively

> Floating, minimalist appearance without visible fastening

> Integrates harmoniously into tone-on-tone concepts

> Combines functionality with architectural clarity

BLANKE ECKBERT is a practical corner shelf for modern shower areas. It provides storage space, for example in the shower, keeping shampoo and shower gel neatly in place. The corner shelves, made of robust stainless steel, are available in various shapes and colors. Different patterns are cut into the shelf surface to prevent standing water. This ensures easy cleaning and maintenance. The shelf can be retrofitted into the joint without drilling.

GRADIENT AND SHOWER PROFILE

Slope and shower profiles for level-access walk-in showers

BLANKE GRADIENT AND SHOWER PROFILE

THE ADVANTAGES AT A GLANCE

> Detail solutions around the shower without tile cutting or drilling

> Perfectly matching finishing, slope, and glass support profiles made of stainless steel

> Enable consistent tone-on-tone designs in the shower area

> Minimalist, elegant lines for modern bathroom design without a shower tray

> Harmonious integration into wall and floor surfaces

Elegant and barrier-free walk-in showers can be easily designed with BLANKE AQUA PROFILES. Walk-in showers without a shower tray enable a clean, high-quality appearance without edges or tripping hazards. The shower profiles eliminate the need for tile cutting in sloped areas. They can be perfectly combined with a linear drainage system. Our glass support profiles are TÜV-certified and particularly safe even without a stabilizer. A key advantage: they are installed together with the tile covering, preventing any perforation of the waterproofing in wet areas.

BLANKE FLEX-LINE GRATE COVER

For BLANKE DISK FLEX-LINE and BLANKE DIBA FLEX-LINE

BLANKE FLEX-LINE GRATE COVER

THE ADVANTAGES AT A GLANCE

> Subtle, harmonious design – perfectly coordinated with the BLANKE GRADIENT AND SHOWER PROFILES

> Height adjustable for maximum flexibility

> Matching grate cover for BLANKE DIBA FLEX-LINE and BLANKE DISK FLEX-LINE

> Blends seamlessly with the tile and surrounding area – without visible transitions

> Ideal for continuous tone-on-tone design concepts

The BLANKE FLEX-LINE GRATE COVER with design insert adds distinctive design accents and complements the BLANKE DISK FLEX-LINE and BLANKE DIBA FLEX-LINE drainage systems. Available in the colours of the BLANKE NEW YORK EDITION, it integrates stylishly into modern bathroom concepts.

The grate cover can be individually adapted and shortened to as little as 40 cm around the drain body. It is suitable for tile thicknesses from 10 to 18 mm and is height adjustable, allowing precise technical adaptation to the specific installation situation.

Every grate cover fits all BLANKE FLEX-LINE drainage units.

BLANKE GRATE COVER 2.0 FRAMELESS

THE ADVANTAGES AT A GLANCE

> Subtle, matching design – ideal in combination with the BLANKE AQUA PROFILES

> Height-adjustable

> Fits both DIBA-LINE 2.0 and DISK-LINE

> Visually blends with tiles and surroundings: no visible transition

> Ideal for consistent tone-on-tone designs

The BLANKE GRATE COVER 2.0 FRAMELESS completes the BLANKE DIBA-LINE 2.0 and BLANKE DISK-LINE linear drainage systems. Thanks to its adjustable support feet, the BLANKE GRATE COVER 2.0 FRAMELESS can be precisely adjusted to the required installation height. Manufactured from high-quality stainless steel, it is available in lengths to match the drainage channels. For barrier-free shower installations, it is the ideal complement to the BLANKE AQUA PROFILES.
